Do you think the rankings produced are acceptable?

Yes, the results seem quite relevant to my queries. For example, "glove" includes both Batting_glove.txt and
Baseball_glove.txt. "Baseball rules" brings up pages on obscure rules of the game (Tie_goes_to_the_runner.txt and
Uncaught_third_strike.txt). "Best pitcher of all time" brings up a number of articles about famous pitchers (John Clarkson,
Nolan Ryan, and Cliff Lee).
